ROAD PRESENCE REDEFINED

Back in 2013, it was hard to find the aftermarket modifications that weren't over the top, so we started designing and manufacturing them ourselves. Over time we found a 'OEM plus' design style was the perfect recipe for redefining luxury and performance vehicles in a subtle yet striking way. Our bespoke vehicle modification service is tailored to each of our customers to provide an experience that always exceeds expectations.

URBAN

EUROPE

URBAN DEFENDER,

THE ICON MADE YOURS

Already firmly established as an icon in it's own right, our modifications to the Defender provide our customers with the opportunity to refine the look of their vehicle even further and also bring practical enhancements to allow ultimate flexibility and practicality. The Urban Defender has quickly established itself as the 'go to' SUV for those wanting to combine go-anywhere ability with the trademark Urban attitude. It's easy to see why it has become our most popular vehicle.
